The Director of Central Intelligence  
Washington, D. C. 20505

31 January 1978

MEMORANDUM FOR: Major General James L. Brown, USAF  
Assistant Chief of Staff for Intelligence  
United States Air Force

SUBJECT: Foreign Technology Division

1. I have had increasing suggestions recently that the U.S. intelligence community could be doing more to keep U.S. industry apprised of trends in foreign technology. This is clearly a very delicate area, but one which does deserve our close consideration.

2. In this connection I have been told that FTD does have a program of periodic briefings for industry on R&D programs abroad. I would appreciate some background information on how these operate and how useful they have proved to be.
